Eye Care

Important Insurance Notice:

Many Insurance plans now offer both routine vision coverage and medical eye care coverage.

If your exam reveals or addresses a medical eye condition, diagnosis, symptom, or concern, the visit may need to be billed through your medical insurance benefit instead of your routine vision benefit.

This includes conditions such as cataracts, dry eye, glaucoma concerns, diabetic eye disease, macular degeneration, eye irritation, sudden vision changes, and other medical eye issues.

We appreciate your understanding as we follow insurance billing guidelines and submit claims based on the exam findings and diagnosis.

Thank you.
